PRIMARY EXAMINER

Art Unit: 1774

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24 are, drawn to elongated structural rebar, classified in class 428, subclass 294.7
 - II. Claims 25-42 are, drawn to method for making frp, classified in class 264, subclass 638
2. The inventions are distinct, each from the other because:
3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by injection molding
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. A telephone call was made to Stitt Richard on 8-24-04 to request an oral election to the above restriction requirement, but did not result in an election being made.
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1774

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
